

Senior Environmental Consultant

Who we are:

NTS Environmental Science and Engineering is a leading provider of comprehensive environmental services, offering consulting, engineering, engineering support, and data management solutions to a diverse clientele in northern Minnesota's Iron Range region. Our company has an employee-driven culture that promotes professional development and growth. We prioritize integrity, safety, client-focus, and excellence in all aspects of our work. We provide competitive pay based on experience level, a comprehensive benefits package, flexibility, and opportunity for advancement.

Position Description:

The Senior Environmental Consultant is responsible for independently managing Phase I and II Environmental Site Assessments (ESAs) and subsurface investigations for residential, commercial, and industrial properties.

Primary accountabilities include, but are not limited to:

- Plan, design, and direct Phase I ESA and Phase II investigations in accordance with regulatory requirements.
- Review and interpret analytical data, developing strategies for managing soil, groundwater, surface water, and vapor contamination.
- Prepare technical reports with clear conclusions and actionable recommendations, demonstrating a thorough understanding of regulatory compliance.
- Coordinate and oversee field activities, including drilling of soil borings, installation of groundwater monitoring wells, excavation of contaminated soils/materials, wetland delineations, and geotechnical evaluations.
- Communicate project requirements and schedules, findings, and recommendations to clients, regulatory agencies, and internal staff.
- Perform business development activities including developing and maintaining client relationships, attending networking events, participating in conferences and seminars, and actively pursuing involvement in professional organizations.
- Prepare proposals for various project opportunities and establish reasonable budgets and scopes of work.
- Facilitate the development of sites for redevelopment, including environmental cleanup and pre-demo inspections.
- Provide mentorship and technical guidance to junior staff, supporting their professional development and ensuring high-quality project execution.
- Support the NTS safety program through safe work practices, policy adherence, hazard reporting, and commitment to safe project execution.
- Other duties as assigned or necessary.

Qualifications:

- Bachelor's degree in science or engineering.
- 5+ years of relevant experience in environmental consulting, site investigation, or remediation.
- Strong understanding of environmental remediation and hazardous materials response.
- Strong knowledge of Brownfields Amendments, CERCLA, and RCRA regulations.
- Demonstrated ability to meet deadlines and manage priorities.
- Demonstrated ability to write comprehensive, high-quality technical reports.
- Demonstrated ability to collaborate with multidisciplinary teams and bridge gaps between different professional disciplines.
- Professional certification such as PE or PG preferred.
- Project management experience preferred.

Compensation & Schedule:

Position Type: Full-time

Compensation: Starting at \$110,000 per year, based on experience and education. Comprehensive benefits package including health insurance, retirement plan, paid time off, and professional development.

Work Schedule: Monday – Friday
